

It is unrealistic for stations to be required to record an ENTIRE broadcast day and maintain those recordings for 60 to 90 days. The cost of tapes and manpower would be in the thousands of dollars for one channel alone - a real burden for a small station such as KWBU. We are also a digitally converted station, and the cost would increase by four times if we had to do this for all channels. We would not be able to absorb the cost for such an endeavor.

Thank you for your time.
